

GOAL 1

Restored and Conserved Habitats

Habitats in the ocean and along the coast, including the rivers that flow to the Gulf, are healthy, productive, and resilient. They support rich aquatic life and a vibrant, sustainable ocean economy.

OUTCOME 1.1

Water Quality Protection

Coastal decision-makers receive up-to-date, accurate, relevant information needed to improve and protect marine water quality for current and future generations.

OUTCOME 1.2

Habitat Restoration

Habitat restoration practitioners and community-based organizations receive information, funding, and technical assistance for restoring degraded coastal ecosystems and habitats.

OUTCOME 1.3

Habitat Conservation

Coastal decision-makers have the data and information required to conserve coastal and marine habitats in a time of intensifying human uses and a changing climate.

GOAL 2

Environmental and Human Health

Environmental conditions support the health of people and the ecosystem.

OUTCOME 2.1

Environmental Monitoring

Scientists and coastal decision-makers have access to data for assessing environmental conditions in the ocean and along the coast.

OUTCOME 2.2

Environmental Indicators and Reporting

Managers receive understandable, useful, reliable information about environmental conditions and trends in the region.

OUTCOME 2.3

Climate Adaptation

Decision-makers receive up-to-date information about the impacts of a changing climate on coastal and ocean areas and approaches for adapting to these impacts.
